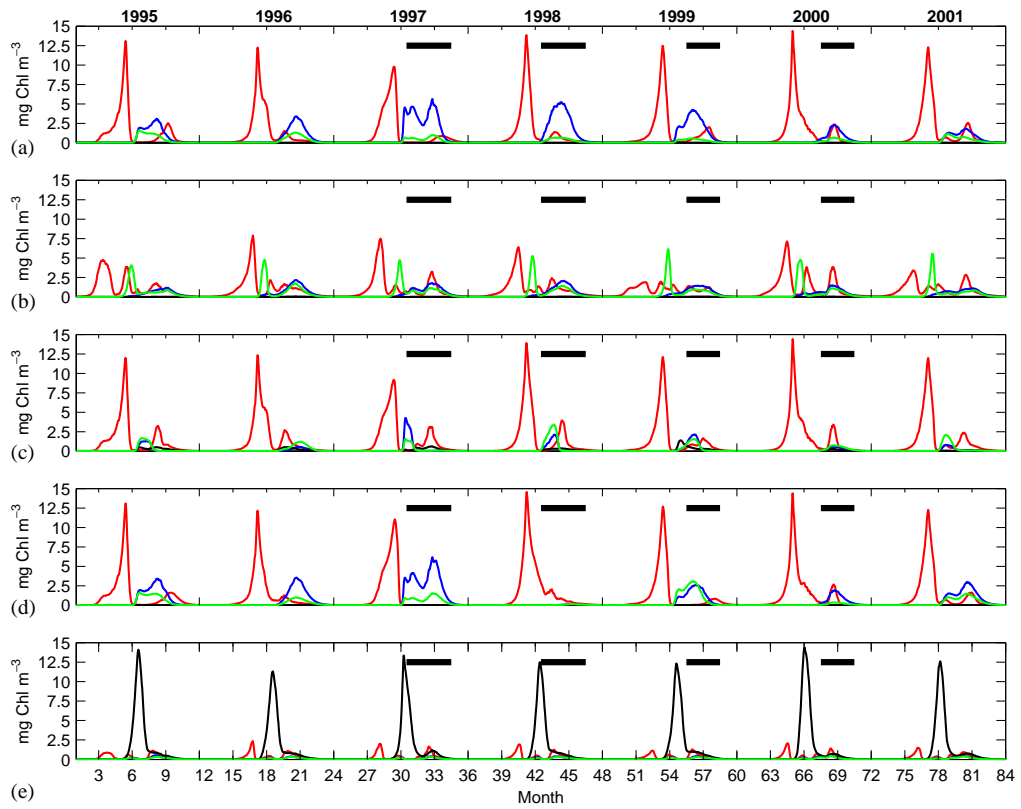

Fig. 14. Results of sensitivity analyses: (a) standard run, (b) no photoinhibition, (c) microzooplankton not grazing diatoms, (d) microzooplankton not grazing diatoms and only lightly grazing *E. huxleyi* and (e) microzooplankton grazing equally on diatoms, flagellates and *E. huxleyi*. In all plots the red line represents diatoms, the blue line *E. huxleyi*, the green line flagellates and the black line dinoflagellates.
